Item #10152

K9 ASPIRATOR / RESUSCITATOR KIT

This combination aspirator / resuscitator kit is convenient and portable for the canine handler.

With a dog which is not breathing, the airway must be cleared of potential smoke, dust, vomit, blood or other foreign material. The aspirator end helps to clear the passageway, while the resuscitator end introduces a controlled, safe and repeatable volume of air into the canine's lungs.

Use the resuscitator for introducing fresh air while following normal canine CPR procedures.

Kit includes:

- Aspirator / Resuscitator Pump
- Resuscitator Mask - Large
- Supplemental Oxygen Adapter - Large
- Aspirator Mask - Large
- Oxygen Recovery Mask - Large
- Heavy Duty Water Resistant Bag with Shoulder Strap
